SPONSORSHIP OPPORTUNITIES

RECOGNIZING EXCELLENCE IN STEEL DESIGN AND INNOVATION

2017 Ontario Steel Design Awards of Excellence

Tuesday May 9, 2017
Art Gallery of Ontario

CISC ONTARIO REGION

The Ontario Region promotes the steel industry in Ontario through advocacy, government lobbying and marketing activities that are specific to the needs of our members and associates. The CISC Ontario Region is actively engaged with our members in the steel community to ensure continued growth and promote excellence in design, erection and construction.

AWARD CELEBRATION: MAY 9, 2017

- Welcome Reception
- Celebration Banquet
- Sit-Down Dinner
- Design Awards Program
- History of Strength Awards Program

AWARDS

The CISC Ontario Steel Design Awards include submissions in the following categories:

Architectural

Buildings or other structures in which architectural considerations predominantly influenced the design of the structure.

Engineering

Buildings, process plants or other structures in which engineering considerations

predominantly influenced the design and construction of the structure.

Sustainability

Buildings or other structures in which steel has been reused, recycled or used as part of a sustainable development project i.e. LEED certification. If the project's steel has been recycled, an emphasis should be placed on value of time / money saved. If the project is submitted as a sustainable project please include a LEED scorecard or explain the overall impact to the project.

Projects Converted into Steel

Buildings or other structures in which structural steel was chosen over other building material because of its unique qualities. This could be a project where structural steel was used in a project where other building materials could have been used, please explain why steel was chosen, or where steel was used to create an innovative product.

Bridges

Both vehicle and pedestrian bridges are eligible projects for this category where Structural Steel is the primary building material. A focus should be made on specific fabrication and erection challenges.
